

REQUEST A THERMOFORMED MATERIAL SAMPLE

FROM OUR STATE-OF-THE-ART COLOR LAB

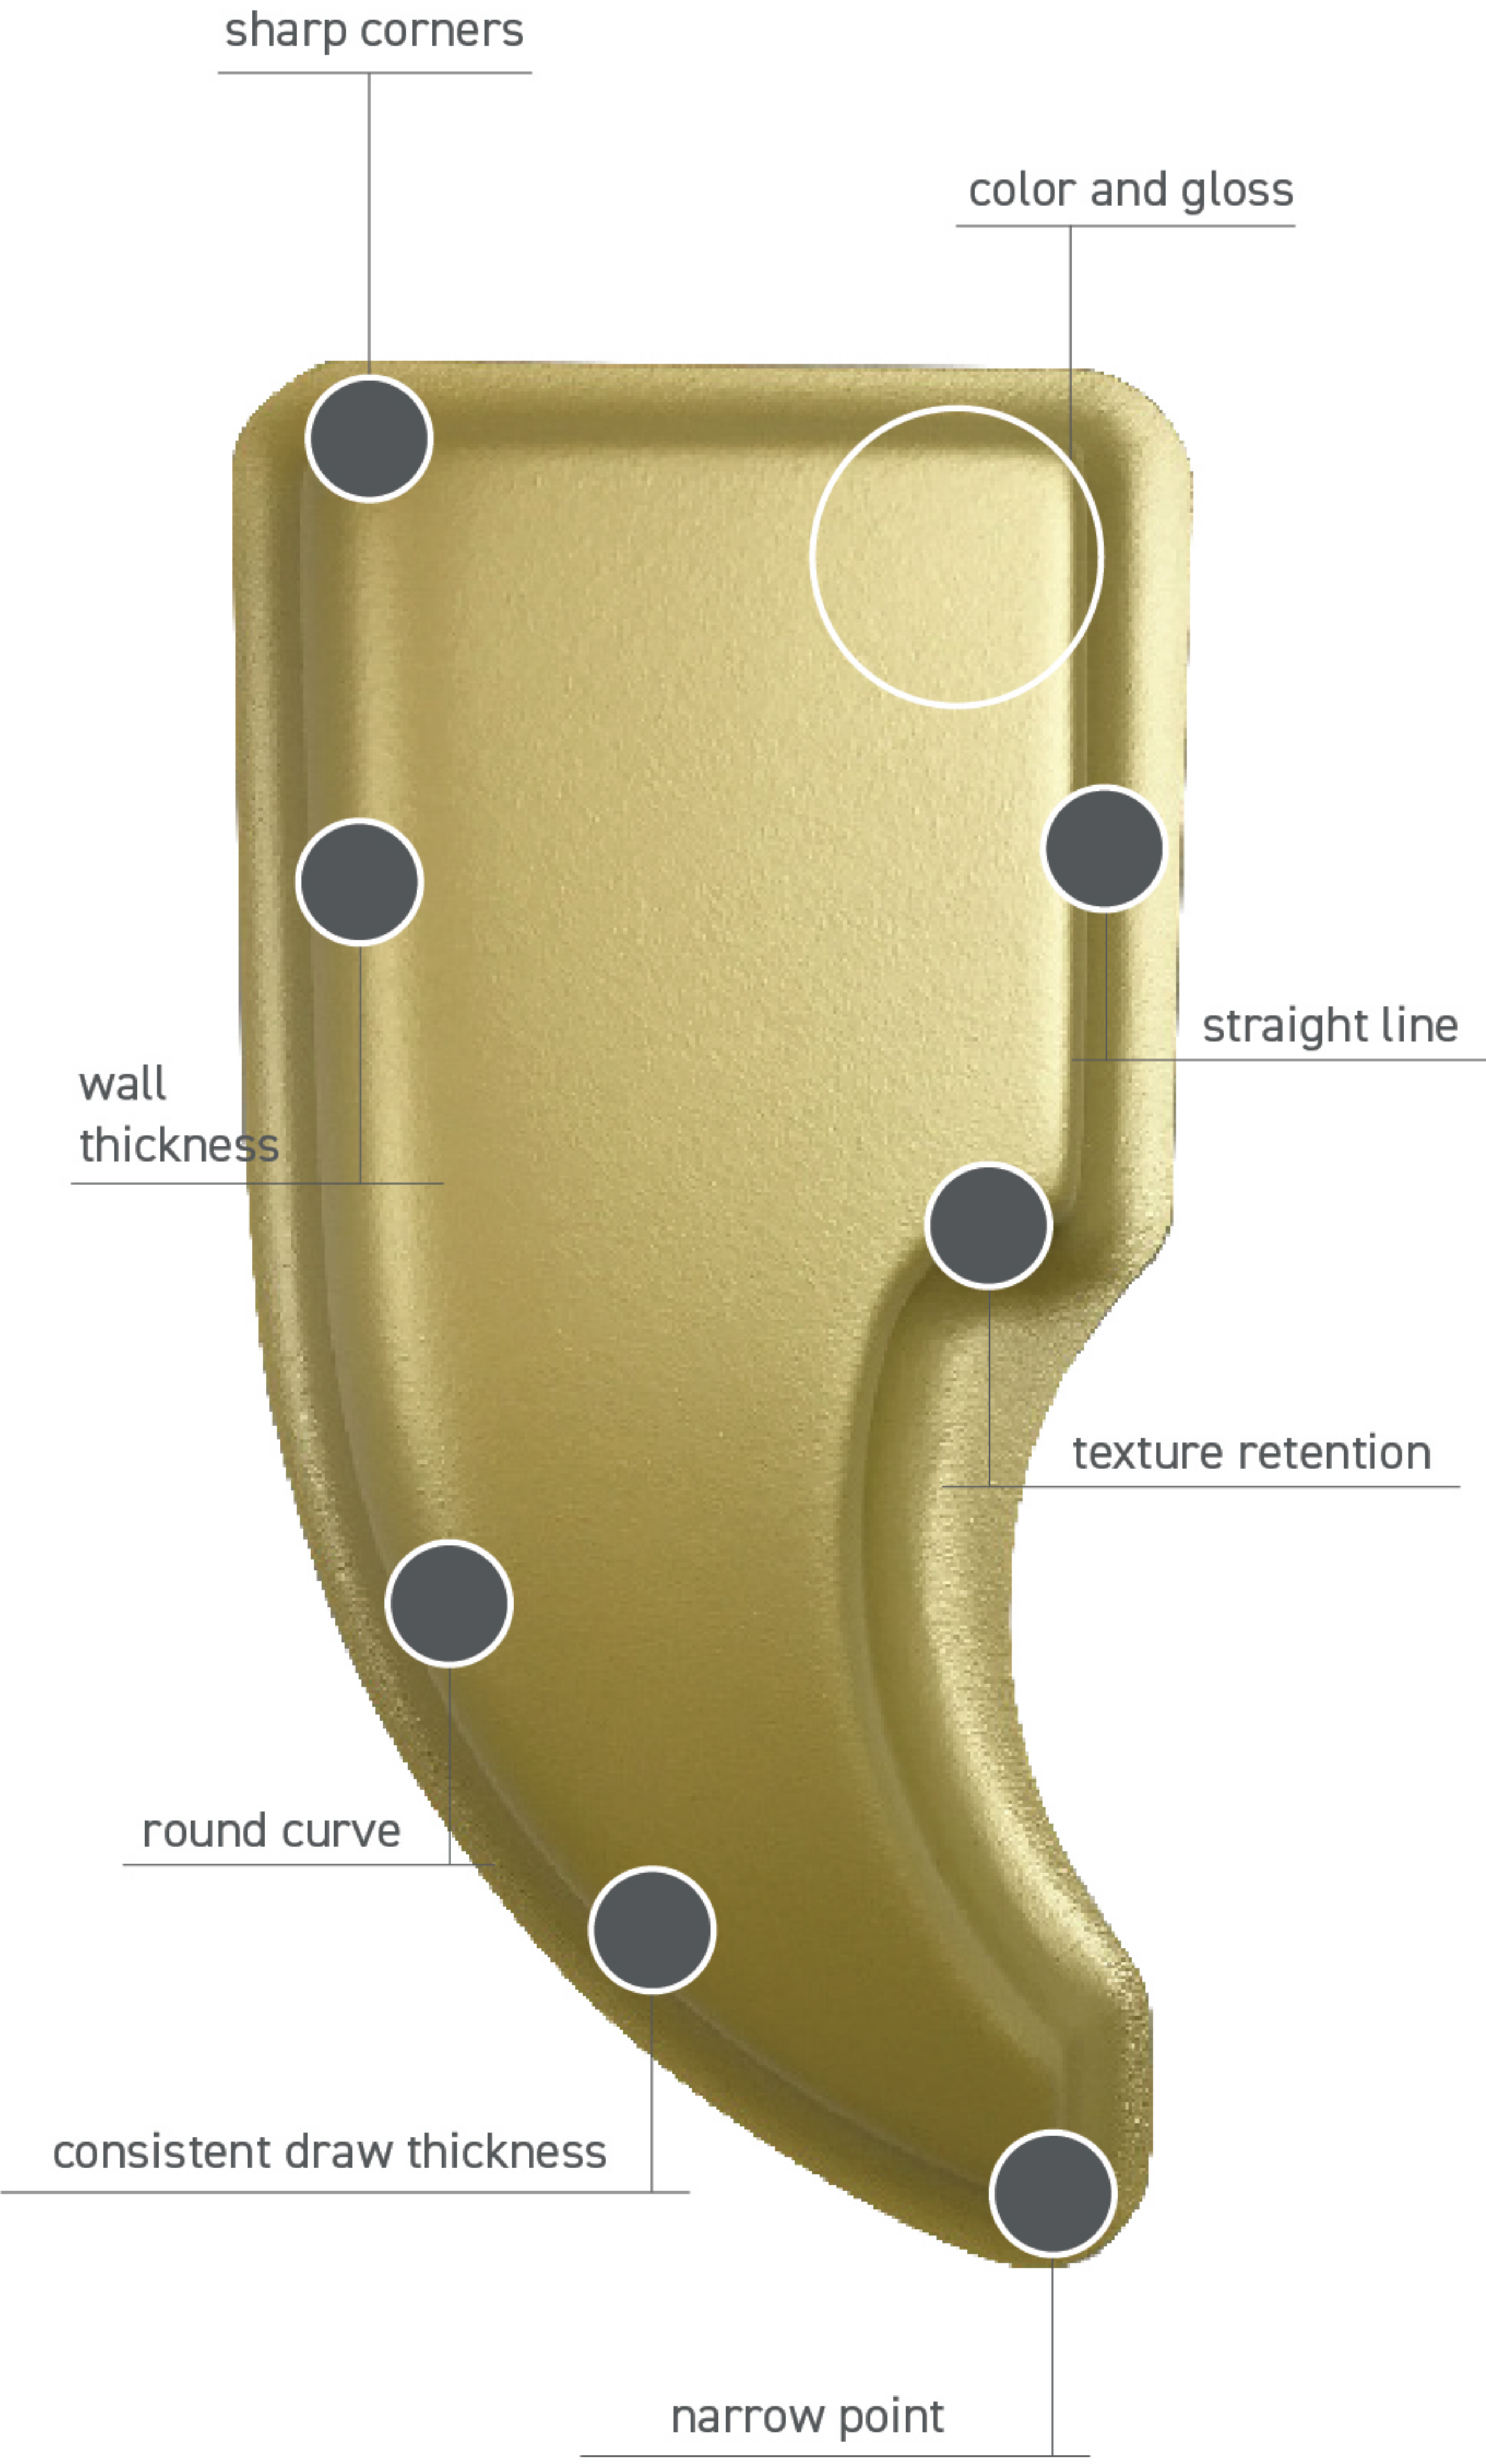

COMMA CHAMELEON

Like a chameleon, SIMONA Boltaron material can take on any color, texture, pattern or design with unlimited options for customization. Request a thermoformed material sample to see how the material maintains its appearance after forming.

WHY THE COMMA?

The thermoformed comma shape demonstrates how a part will maintain its color, gloss, texture, wall thickness, and form after undergoing the thermoforming process.

CUSTOM COLOR MATCHING WITH UNLIMITED POSSIBILITIES

From solid colors to metallics and pearlescents, SIMONA Boltaron can provide a custom color match in as little as 72 hours within receipt of the sample.
