## SIMONA Boltaron Recognized with Sustainability Award

November 25, 2024 - At the 13th annual Global Supplier Day, hosted by RECARO in Schwaebisch Hall, Germany, SIMONA Boltaron Inc. was honored with the first Sustainability Award. The event, which gathered suppliers from around the world, recognized outstanding contributions across several categories, with SIMONA Boltaron standing out for its commitment to sustainable innovation in the aviation industry.

The award highlights SIMONA Boltaron's ongoing efforts to reduce energy consumption, promote a circular economy, and implement in-house recycling solutions. A key initiative is the development of TERREFORM®, a cutting-edge material made with up to 100% recycled content. By utilizing high-impact thermoplastics, SIMONA Boltaron continues to deliver lightweight, durable solutions that meet the stringent demands of the aviation sector.

"We are incredibly proud of this recognition," said Tanya Saracino, Business Development Manager SIMONA Boltaron. "Our partnership with RECARO pushes us to continually innovate and find new ways to contribute to a sustainable future. It is essential that all stakeholders along the value chain work together on sustainable solutions and make joint progress in this area."

The award ceremony was part of a day filled with engaging workshops and insightful discussions on the future of the industry, offering an excellent platform for valuable exchanges and collaboration among industry experts.

This recognition reaffirms SIMONA Boltaron's leading role in shaping a greener, more sustainable aviation industry.

Grow together – for a sustainable future!

## About SIMONA Boltaron

SIMONA Boltaron, a division of SIMONA AMERICA Group, specializes in producing high-performance thermoplastic sheet materials and specialty parts. From its state-of-the-art facility in Newcomerstown, Ohio, SIMONA Boltaron integrates calendering, extrusion, and press lamination processes under one roof. This unique combination enables the company to create sheet materials with unmatched design versatility and forming capabilities.

Serving industries such as aerospace, mass transportation, medical, wall protection, and general thermoforming, SIMONA Boltaron delivers solutions that meet the most stringent performance and design requirements. For more information, visit [www.boltaron.com](http://www.boltaron.com).
