SIMONA Boltaron and Geven Advance Strategic Materials Partnership Across Global Airline Programs

Newcomerstown, OH — April 14, 2026 — SIMONA Boltaron, a leading manufacturer of high-performance thermoplastic sheet for aircraft interiors, is highlighting its growing materials partnership with Geven, a leading global seat manufacturer recognized for its specialty seating solutions. The companies are supporting innovative seating programs for major airlines, which will be showcased at Aircraft Interiors Expo (AIX) 2026.

Geven has rapidly gained recognition among global airlines for its ability to deliver innovative, lightweight seating solutions across the economy and premium-economy segments. Through a collaborative materials partnership, SIMONA Boltaron has supported several of Geven's airline programs with advanced thermoplastic materials engineered to meet the demanding performance, safety, and aesthetic requirements of modern aircraft cabins.

Among the most representative collaborations are two major airline programs currently underway.

For a major airline's Airbus A220 fleet, Geven is supplying its new Essenza EL economy-class seat, incorporating Boltaron® 9815N for key trim-and-finish components.

SIMONA Boltaron is also supporting Geven on another important milestone program in the overseas market. The airline selected Geven's Comoda for its Business Class featuring Boltaron® 4330 with a metallic finish to enhance the seat's visual expression while maintaining the durability and compliance required for aircraft interiors

This program represents a significant milestone for Geven, with over 150 shipsets planned. These new seats support the ongoing evolution of the airline's Business Class, contributing to an enhanced passenger experience.

SIMONA Boltaron and Geven Advance Strategic Materials Partnership Across Global Airline Programs - Page 2 -

“Having a trusted partner like SIMONA Boltaron alongside us plays a key role in the execution of this program,” said Francesco Varriale, Operations & Supply Chain Director at Geven.

“SIMONA Boltaron is excited to be part of the momentum surrounding Geven’s expansion into the U.S. airline market while continuing to strengthen our partnership on global airline programs,” said Chris Corona, Vice President of Aerospace Strategy at SIMONA Boltaron.

“This collaborative approach has allowed us to support Geven across multiple program releases while elevating the design expression of their business class. The use of Boltaron® 4330 with a metallic finish on the beautiful Comoda seat is a great example of how performance materials and thoughtful design can come together.”

Both companies will highlight their collaboration at Aircraft Interiors Expo 2026, where visitors will have the opportunity to see Geven seating solutions and learn more about the materials that help bring them to life.
